

# SCIENCE AGORA : US-Japan Forum

## ~ The Science of Broadening Participation ~

### *Lessons Learned to Broaden the Participation of Women in STEM*

Sponsored by the U.S. National Science Foundation (NSF) and Japan Science and Technology Agency (JST)

In science and technology (S&T) fields, women remain an untapped resource and participate at levels far below their representation in society. The Science of Broadening Participation provides evidence-based insights about how to effectively broaden women's participation in S&T. At this forum, two speakers each from the U.S. and Japan will share information about this. Their presentations will be followed by a moderated panel discussion that will consider the challenges and as well as recommendations for future steps forward in this area.

**[Date & Time]** Nov. 13 (Fri.), 2015 10:30~13:00

**[Venue]** Miraikan 7F Hall

- Simultaneous interpretation service to be provided
- Participation: Free of charge

**Prior on-line registration is required at:**
